This covert antenna is a genuine OEM antenna for a Ford and can be fitted to most of their range of vehicles. Ideal for modern Ford models that don't have a roof mounted antenna. Supplied as standard in a black plastic, but can be painted to match your vehicle colour if needed. Once painted each of our antennae is individually tested to make sure the frequency performance is not affected by the paint finish supplied.

The antenna has 1x 300mm RG316 low loss cables exiting the antenna.

This antenna can be purchased with many different functions. Please contact us for more information.
