This 'Mallard' is supplied as a kit with all coax cables to support general SMA connections, mostly suited to vehicle routers, and your existing Tetra Radio as this kit included the correct GPS adaptor cables to support Motorola and Sepura Tetra radios to give a complete transition solution.

With market leading isolation to support ESN, as well as your current Tetra radio, there is no need to fit two antennas to your vehicle. With many fitting kit options available there is no reason to drill unwanted holes to the roof of your car. Contact Sure Antennas for many optional fitting accessories.

Designed as a multi-function antenna, the Mallard supports 2x2 MiMo from 698MHz to 6GHz with a minimum 4dBi gain across the whole band. With the additional functionality of 4x4 MiMo 2.4/5.8GHz WiFi function, 2x GPS/GNSS Ports, and Tetra, this antenna would be an ideal solution for future proofing your new vehicle installations for ESN.

With a single hole installation, and so many potential frequency functions on offer, this antenna would help reduce installation costs and protect your vehicles resale value. Available with an option of 3m or 5m low loss coax extension cables all terminated and labeled for ease of installation.
