

SK0200740 Sandcastle Antenna 7-in-1 Black incl. 5m Coax Cables - Tetra

- 7 Functions in 1 Antenna
- Optional Support for Tetra Whip
- 4x4 MiMo Wideband 2G 3G 4G 5G
- Ultra-Wide Bandwidth 698MHz – 6000Mhz
- Low Profile
- Simple, Single Hole Installation
- 2x GPS/GNSS Ports DC Isolated
- CE Directive 2014/53/EU Compliant

Available in white: SK0200790

The 'Sandcastle' is a multifunction antenna designed to future-proof blue and amber light vehicle fleets. It integrates 7 functions into a single, panel-mounted unit, making it an efficient choice for public safety and emergency services.

The Sandcastle features 4 ultra-wideband cellular antenna elements that cover frequencies from 698MHz to 6GHz, offering a minimum gain of 4dBi across the band. This ensures robust, reliable communication for various applications. The antenna can also be installed as a ground plane-independent unit, simplifying the installation process.

In addition to cellular coverage, the Sandcastle includes GPS and a TETRA whip which are accessible through a single 19mm hole in the vehicle's roof, eliminating the need for multiple installations. This design reduces installation time and maintains vehicle integrity.

Custom options, such as low-loss coax cable fitting kits, are also available. Contact us for more details on how the Sandcastle can meet your fleet’s needs.
