

## SK010016 Mini Fitting Kit with Light Mod

Introducing the **Mini Fitting Kit with Light Mod (SK010016)**, designed for seamless installation and optimal performance. This kit includes a **high-quality LTE T-Bar antenna**, which should be adhered to the interior of the headlining in the roof or near a window, ensuring that it is positioned away from metallic objects to **maximise signal reception**. Additionally, the **GPS antenna** must be mounted with the **SKY facing upwards**, preferably located beneath the plastic trim towards a window. For best results, ensure that the GPS antenna is positioned horizontally and remains free of metallic obstructions above it. Experience **enhanced connectivity and reliability** with this expertly crafted fitting kit.

Once the installation is complete, power up your vehicle and check the dashboard status screen for any **'SOS' error messages**. If such an error appears, please verify all connections and reset the vehicle software using the manufacturer's service software, then retest the system. Should the problem persist, do not hesitate to **contact our technical team** at +44 (0)333 360 9249 for further assistance.
