

SK030113 MODIFY ONLY PEUGEOT OPEL PSA OEM Conversion Kit

Mounting Plate:

Introducing the **MODIFY ONLY PEUGEOT OPEL PSA OEM Conversion Kit (SK030113)**, designed for **seamless integration and enhanced connectivity** in your vehicle. This kit includes **premium LTE antennas** that can be easily adhered to the inside of the headlining or a window, providing a **discreet and efficient installation**. For optimal performance, please avoid affixing them to metallic surfaces.

When mounting the **GPS antenna**, it is essential to position it with the **SKY facing upwards**, ideally beneath the plastic trim and close to a window. Ensure that the **GPS antenna remains horizontal** and free from metallic obstructions above it to achieve the best performance.

Once the installation is complete, power up your vehicle and check the dashboard status screen for any **'SOS' error messages**. If such an error appears, please verify all connections and reset the vehicle software using the manufacturer's service software, then retest the system. Should the problem persist, do not hesitate to **contact our technical team** at +44 (0)333 360 9249 for further assistance.
