

SAFT10030-F7 Supply & Modify Covert Fiat Doblo Van Antenna – 1 FUNCTION

This product is designed to **supply and modify parts** to support a frequency range of 380-430MHz. It ensures that the **VSWR** matches the paint finish, maintaining optimal performance. All original equipment manufacturer **(OEM) functions** are retained, ensuring seamless integration with existing systems. The product also includes a **TETRA** antenna that fits perfectly with the original parts. Additionally, **VSWR** test results are provided to confirm the product's **reliability and compatibility**.

This antenna is a centre roof panel mount antenna with a **single nut fitment** and features a removable whip to allow for vehicle washing and maintenance. It is **compatible** with most of **Fiat's** range and can be purchased with many **different frequency bands and functions**. Contact us for more information.

Technical Specifications*

| Band | TETRA | OEM Functions |
|-----------------------|------------|--|
| Frequency Range (MHz) | 380-430MHz | All OEM functions & connectors retained. |
| Input Power | 25W | |
| Gain | 4.8dBi | |
| Polarisation | Vertical | |
| VSWR | <2.5:1 | |
| Impedance | 50Ω | |
| Connection | SMA (m) | |
| Extension Lead | BNC (m) | |

*Tested using 5m of SBC-195 on 1.5 ground plane. Gain calculated using HFSS.

Subject to change.
