

## SK030101 BMW OEM Conversion Kit V1 c/w OEM Shark Fin Part

This **BMW OEM Conversion Kit (SK030101)** offers an efficient and streamlined solution for **integrating CANBUS functionality** with minimal impact on vehicle aesthetics. This kit includes **LTE T-Bar antennas** designed for easy installation inside the headlining of the car roof or on a window, avoiding metallic surfaces for optimal signal strength. The antenna housing should be securely slid into the **CANBUS device** until it clicks, ensuring a stable connection. External antennas are colour-coded for **accurate attachment** to the corresponding **FAKRA connectors**. Once the antennas are positioned, the CANBUS unit is ideally placed between the **car roof and headlining**, where it can be secured with **adhesive** to prevent shifting. For **optimal GPS performance**, the GPS antenna should be mounted with the **SKY side facing up**, ideally near a window under plastic trim, with no metallic interference above it.

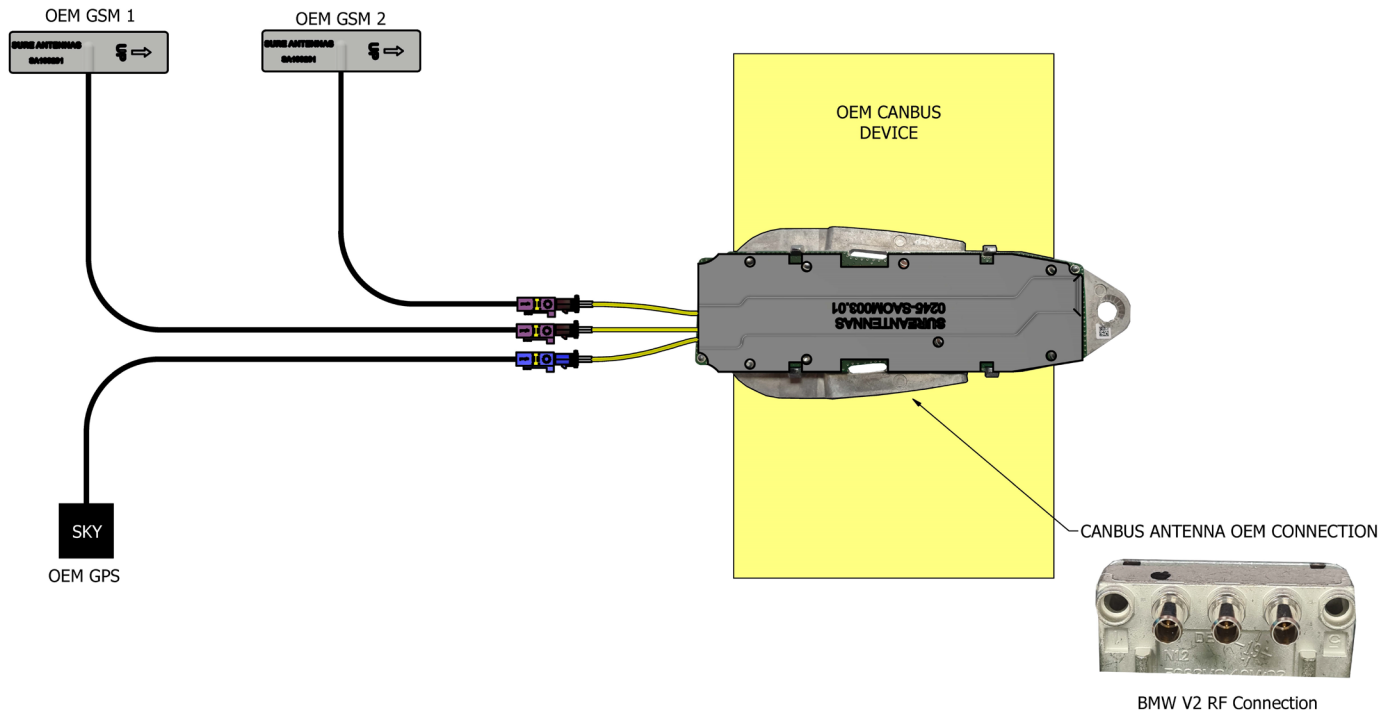

### Technical Specifications

Part No.	SK030101	
Antenna	2x OEM GSM	1x OEM GPS
<b>Mechanical Data</b>		
Dimensions (mm)	H7xW140xL25	H15xW35xL35
Operating Temp (°C)	-30 / +70°C	-30 / +70°C
Colour	Grey	Black
<b>Cable Data</b>		
Cable Type	LBC100	LBC100
Length (m)	5	5
Termination	Burgundy FAKRA (m)	Blue FAKRA (m)
<b>Mounting Data</b>		
Mounting Type	Adhesive	Adhesive

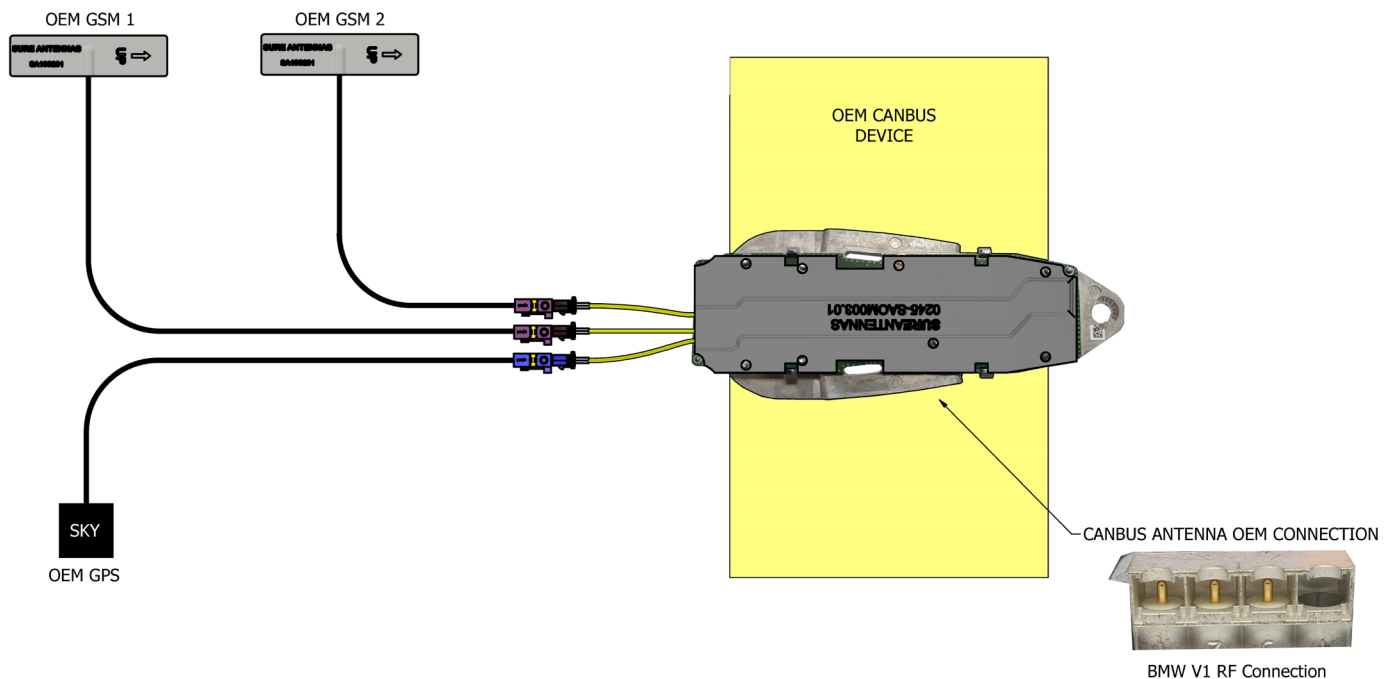

Subject to change.
